

KKR REAL ESTATE FINANCE TRUST INC. REPORTS FIRST QUARTER 2025 FINANCIAL RESULTS

New York, NY, April 23, 2025 - KKR Real Estate Finance Trust Inc. (the “Company” or “KREF”) (NYSE: KREF) today reported its financial results for the quarter ended March 31, 2025.

Reported net loss attributable to common stockholders of (\$10.6) million, or (\$0.15) per diluted share of common stock, for the three months ended March 31, 2025, compared to net income attributable to common stockholders of \$14.6 million, or \$0.21 per diluted share of common stock, for the three months ended December 31, 2024.

Reported Distributable Earnings of \$17.0 million, or \$0.25 per diluted share of common stock, for the three months ended March 31, 2025, compared to a Distributable Loss of (\$14.7) million, or (\$0.21) per diluted share of common stock, for the three months ended December 31, 2024.

First Quarter 2025 Highlights

- \$720.3 million liquidity position, including \$106.4 million of cash and \$570.0 million of undrawn capacity on our corporate revolving credit agreement as of March 31, 2025
- Originated and funded \$376.3 million and \$374.0 million, respectively, relating to four floating-rate loans, with a weighted average appraised loan-to-value ratio ("LTV")⁽²⁾ and coupon of 69% and S+2.8%, respectively; and funded \$31.6 million in loan principal for existing loans
- Received \$183.6 million in loan repayments
- Refinanced existing Term Loan B of \$340 million with a new \$550.0 million Term Loan B due March 2032; the new loan bears interest at S+3.25%
- Increased the borrowing capacity of the corporate revolving credit facility by \$50.0 million to \$660.0 million and extended the maturity through 2030
- Entered into a new \$300.0 million term lending agreement, which provides match-term financing on a non-mark-to-market basis
- Current loan portfolio of \$6.1 billion:
 - 99% floating rate with a weighted average unlevered all-in yield⁽¹⁾ of 7.6% as of March 31, 2025
 - Multifamily and industrial assets represent 61% of the loan portfolio
 - Weighted average LTV of 65%
 - Collected 100% of interest payments due on the loan portfolio
 - Average risk rating of the loan portfolio was 3.1, weighted by outstanding principal amount
- Diversified financing sources totaling \$8.3 billion with \$3.1 billion of undrawn capacity:
 - 78% of secured financing is fully non-mark-to-market and the remaining balance is mark-to-credit only
 - No final facility maturities until 2026 and no corporate debt due until 2030
- Repurchased and retired 889,100 shares at an average price per share of \$11.03 for a total of \$9.8 million
- Common book value of \$982.1 million, or \$14.44 per share, as of March 31, 2025, inclusive of a CECL allowance of \$144.4 million, or (\$2.12) per share. The CECL allowance increased by \$24.9 million, or (\$0.36) per share, for the three months ended March 31, 2025 primarily due to additional reserves for watchlist loans in the multifamily and life science sectors.

Matt Salem, Chief Executive Officer of KREF, said: “KREF is well positioned for this market environment with strong liquidity and durable financing. We returned to offense in the first quarter with originations over \$375 million and we will continue to actively replace repayments with new originations.”

Patrick Mattson, President and Chief Operating Officer of KREF, added: “This quarter we continued to build upon KREF’s best-in-class financing structure adding an incremental \$560 million of non-mark-to-market capacity. We increased our Term Loan B due March 2032 to \$550 million, our revolving credit facility to \$660 million and added a new secured facility with matched term. With the facility refinances, KREF has no corporate debt maturities over the next five years.”

- (1) All-in yield includes amortization of deferred origination fees, loan origination costs and purchase discounts.
- (2) LTV is generally based on the initial loan amount divided by the as-is appraised value as of the date the loan was originated. Weighted average LTV excludes loans with a risk rating of 5.

Definitions:

“Loan-to-value ratio”: Generally based on the initial loan amount divided by the as-is appraised value as of the date the loan was originated. For the CMBS B-Pieces, LTV is based on the weighted average LTV of the underlying loan pool.

“Distributable Earnings”: Distributable Earnings, a measure that is not prepared in accordance with GAAP, is a key indicator of the Company's ability to generate sufficient income to pay its quarterly dividends and in determining the amount of such dividends, which is the primary focus of yield/income investors who comprise a significant portion of the Company's investor base. Accordingly, the Company believes providing Distributable Earnings on a supplemental basis to its net income as determined in accordance with GAAP is helpful to its stockholders in assessing the overall performance of the Company's business.

The Company defines Distributable Earnings as net income (loss) attributable to common stockholders or, without duplication, owners of the Company's subsidiaries, computed in accordance with GAAP, including realized losses not otherwise included in GAAP net income (loss) and excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization, (iii) any unrealized gains or losses or other similar non-cash items that are included in net income for the applicable reporting period, regardless of whether such items are included in other comprehensive income or loss, or in net income, and (iv) one-time events pursuant to changes in GAAP and certain material non-cash income or expense items agreed upon after discussions between the Company's manager and board of directors and after approval by a majority of the Company's independent directors. The exclusion of depreciation and amortization from the calculation of Distributable Earnings only applies to debt investments related to real estate to the extent the Company forecloses upon the property or properties underlying such debt investments.

Distributable Earnings should not be considered as a substitute for GAAP net income or taxable income. The Company cautions readers that its methodology for calculating Distributable Earnings may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and as a result, the Company's reported Distributable Earnings may not be comparable to similar measures presented by other REITs.
