Portfolio Details

- (1) Our total portfolio represents the current principal amount on senior and mezzanine loans, net equity in RECOP I, which holds CMBS B-Piece investments, and net carrying value of our sole REO investment. Excludes one impaired mezzanine loan with an outstanding principal of \$5.5 million that was fully written off.

For Senior Loan 12, the total whole loan is \$375.0 million, co-originated and co-funded by us and a KKR affiliate. Our interest was 50% of the loan or \$187.5 million, of which \$150.0 million in senior notes were syndicated to a third party. Post syndication, we retained a mezzanine loan with a commitment of \$37.5 million, fully funded as of March 31, 2023, at an interest rate of L+7.9%.

For Senior Loan 20, the total whole loan is \$509.9 million, co-originated and co-funded by us and a KKR affiliate. Our interest was 31% of the loan or \$159.7 million, of which \$134.7 million in senior notes were syndicated to third party lenders. Post syndication, we retained a mezzanine loan with a commitment of \$25.0 million, of which \$21.2 million was funded as of March 31, 2023, at an interest rate of L+12.9%.
- (2) Total Whole Loan represents total commitment of the entire whole loan originated. Committed Principal Amount includes participations by KKR affiliated entities and third parties that are syndicated/sold.
- (3) Net equity reflects (i) the amortized cost basis of our loans, net of borrowings; and (ii) the cost basis of our investments in RECOP I and REO.
- (4) Weighted average is weighted by the current principal amount for our senior and mezzanine loans and by net equity for our RECOP I CMBS B-Pieces. Non-Senior Loan 1 and risk-rated 5 loans are excluded from the weighted average LTV.
- (5) Coupon expressed as spread over the relevant floating benchmark rates, which include LIBOR and Term SOFR, as applicable to each loan. As of March 31, 2023, 36.2% and 63.8% of our loans by principal amount earned a floating rate of interest indexed to Term SOFR and LIBOR, respectively.
- (6) Max remaining term (years) assumes all extension options are exercised, if applicable.
- (7) Loan Per SF / Unit / Key is based on the current principal amount divided by the current SF / Unit / Key. For Senior Loans 2, 3, 7, 23, 24, 29, 34, 44, 56, and 75, Loan Per SF / Unit / Key is calculated as the total commitment amount of the loan divided by the proposed SF / Unit / Key.
- (8) For senior loans, LTV is generally based on the initial loan amount divided by the as-is appraised value as of the date the loan was originated or by the current principal amount as of the date of the most recent as-is appraised value; for mezzanine loans, LTV is based on the current balance of the whole loan divided by the as-is appraised value as of the date the loan was originated; for RECOP I CMBS B-Pieces, LTV is based on the weighted average LTV of the underlying loan pool at issuance. Weighted Average LTV excludes risk rated-5 loans.

For Senior Loans 16 and 74, LTV is based on the current principal amount divided by the adjusted appraised gross sellout value net of sales cost.

For Senior Loans 2, 3, 7, 23, 24, 29, 34, 44, 56, and 75, LTV is calculated as the total commitment amount of the loan divided by the as-stabilized value as of the date the loan was originated.
- (9) Senior loans include senior mortgages and similar credit quality investments, including junior participations in our originated senior loans for which we have syndicated the senior participations and retained the junior participations for our portfolio and excludes vertical loan participations.
- (10) For Senior Loan 24, the total whole loan facility is \$283.6 million, co-originated and co-funded by us and a KKR affiliate. Our interest was 50% of the facility or \$141.8 million. The facility is comprised of individual cross-collateralized whole loans. As of March 31, 2023, there were ten underlying senior loans in the facility with a commitment of \$141.8 million and outstanding principal of \$91.6 million.
- (11) For Senior Loan 33, Total Whole Loan, Committed Principal Amount, and Current Principal Amount excludes junior mezzanine notes with a total outstanding principal of \$25.0 million that was fully written off.
- (12) For Senior Loan 74, Loan per SF of \$1,061 is based on the allocated loan amount of the residential units. Excluding the value of the retail and parking components of the collateral, the Loan per SF is \$2,321 based on allocating the full amount of the loan to only the residential units.
- (13) Represents our investment in an aggregator vehicle alongside RECOP I that invests in CMBS B-Pieces. Committed principal represents our total commitment to the aggregator vehicle whereas current principal represents the current funded amount.

Key Definitions

“Distributable Earnings”: Commencing for all periods ending on or after December 31, 2020, the Company has elected to present Distributable Earnings, a measure that is not prepared in accordance with GAAP, as a supplemental basis to KREF’s net income as determined in accordance with GAAP as the Company believes it would be useful to investors in evaluating the Company’s operating performance and its ability to pay its dividends. Distributable Earnings replaces the Company’s prior presentation of Core Earnings, and Core Earnings presentations from prior reporting periods have been recast as Distributable Earnings.

The Company defines Distributable Earnings as net income (loss) attributable to stockholders or, without duplication, owners of the Company’s subsidiaries, computed in accordance with GAAP, including realized losses not otherwise included in GAAP net income (loss) and excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization, (iii) any unrealized gains or losses or other similar non-cash items that are included in net income for the applicable reporting period, regardless of whether such items are included in other comprehensive income or loss, or in net income, and (iv) one-time events pursuant to changes in GAAP and certain material non-cash income or expense items agreed upon after discussions between the Company’s Manager and board of directors and after approval by a majority of the independent directors. The exclusion of depreciation and amortization from the calculation of Distributable Earnings only applies to debt investments related to real estate to the extent the Company forecloses upon the property or properties underlying such debt investments.

Distributable Earnings should not be considered as a substitute for GAAP net income. The Company cautions readers that its methodology for calculating Distributable Earnings may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and as a result, the Company’s reported Distributable Earnings may not be comparable to similar measures presented by other REITs.

The weighted average diluted shares outstanding used for purposes of calculating Distributable Earnings per diluted weighted average share has been adjusted from the weighted average diluted shares outstanding under GAAP to exclude potential shares that may be issued upon the conversion of the Convertible Notes. Consistent with the treatment of other unrealized adjustments to Distributable Earnings, these potentially issuable shares are excluded until a conversion occurs, which we believe is a useful presentation for investors. We believe that excluding shares issued in connection with a potential conversion of the Convertible Notes from our computation of Distributable Earnings per diluted weighted average share is useful to investors for various reasons, including: (i) conversion of Convertible Notes to shares would require the holder of a note to elect to convert the Convertible Note and for us to elect to settle the conversion in the form of shares, and we currently intend to settle the Convertible Notes in cash; (ii) future conversion decisions by note holders will be based on our stock price in the future, which is presently not determinable; and (iii) we believe that when evaluating our operating performance, investors and potential investors consider our Distributable Earnings relative to our actual distributions, which are based on shares outstanding and not shares that might be issued in the future.
